Parque de mayores

Senior Playground

Parc d'activité physique pour Seniors

PARQUE DE MAYORES

El envejecimiento es un proceso fisiológico que afecta a todos los sistemas de nuestro organismo y entre ellos, al aparato locomotor. Por esta razón, todas las personas sanas, y más aún las personas mayores, deberían tener una adecuada actividad física general y deportiva, muy eficaz para mantener el bienestar.

Nuestros mayores constituyen un sector de la población creciente. Pasan gran parte del día en las calles, paseando o cuidando de sus nietos mientras los padres trabajan. Tienen mucho tiempo, y pocas posibilidades de ocio al aire libre, especialmente gratuitas.

El Parque de Mayores es una propuesta de entretenimiento que contribuye a que los mayores lleven una vida saludable realizando ejercicio al aire libre mientras charlan o cuidan a los más pequeños.

Es un proyecto social que pretende mejorar su calidad de vida, y que, por su diseño modular, es una inversión al alcance de Administraciones Públicas y Centros Privados.

Se proponen unos **aparatos muy eficaces, de bajo impacto para prevenir lesiones**. Están diseñados para mantener y mejorar la amplitud particular de la mayoría de las articulaciones del cuerpo, la fuerza de las piernas, el equilibrio y la marcha. Esto, unido a su instalación al aire libre, permite, además de entrenar, mejorar el bienestar físico, psíquico y social de la persona.

Los aparatos han sido desarrollados íntegramente por un médico rehabilitador y fisioterapeuta.

Todos los elementos están certificados en el cumplimiento de la **Norma EN16630:2015**, que establece los requisitos de seguridad y métodos de ensayo de los equipos fijos de entrenamiento físico instalados al aire libre.

Fabricado en polietileno de alta densidad, antigraffiti, libre de mantenimiento.

Mecanismos de acero inoxidable y polietileno. Partes metálicas en acero de alta calidad (acero inoxidable, galvanizado, catáforésis, etc).

SENIOR PLAYGROUNDS

Aging is a physiological process that affects all systems of the body and among them the locomotor system. For this reason, all healthy people, and even more seniors, should do adequate physical activity and sport, which is very effective in maintaining wellness.

Our seniors are a growing segment of the population. They spend much of the day in the streets, walking or caring for grandchildren while parents work. They have plenty of time, and little chance of outdoor recreation, especially for free.

The Senior Playground is an entertainment proposal that helps seniors lead healthy lives by exercising outdoors while chatting or looking after children.

It is a project that aims at improving their quality of life and, thanks to its modular design, is an investment affordable to governments and private centers.

We propose **effective, low impact machines to avoid injury**. They are designed to maintain and improve the range of motion of most joints in the body, leg strength, balance and walking position. This, together with its outdoor installation, as well as being fun, improves the physical, mental and social well being of the individual.

The units have been fully developed by a rehabilitation doctor and a physiotherapist.

All units are certified in compliance with European Standard **EN16630:2015**, which sets the safety requirements and test methods of permanently installed outdoor fitness equipment. Stainless steel and polyethylene mechanisms. High quality steel parts (stainless steel, galvanized, cathaphoresis, etc).

Manufactured with anti-graffiti, maintenance free HDPE.

PARC POUR SENIORS

Le vieillissement est un processus physiologique qui affecte tous les systèmes de notre organisme et en particulier l'appareil locomoteur. Pour cette raison, toutes les personnes saines et à plus forte raison les seniors devraient avoir une activité physique générale et sportive adéquate, essentielle pour maintenir le bien-être.

Nos seniors constituent une frange de la population en constant accroissement. Ils passent une grande partie de la journée dehors, promenant ou prenant soin de leurs petits enfants pendant que leurs parents sont au travail. Ils disposent de beaucoup de temps et de peu de possibilités de loisirs à l'air libre, particulièrement gratuits.

Le Parc d'activité physique pour Seniors est une proposition de distraction qui contribue à ce que les seniors aient une vie salubre en réalisant des exercices en plein air pendant qu'ils discutent ou prennent soin des plus petits.

C'est un projet social qui prétend améliorer leur qualité de vie et qui par sa conception modulaire représente un investissement à la portée des Administrations Publiques ou Centres privés.

Nous proposons des **appareils efficaces et à faible impact, pour prévenir des blessures**. Ils sont conçus pour maintenir et améliorer l'amplitude articulaire de la plupart des articulations du corps, de la force des jambes, de l'équilibre et de la marche. Ceci, allié à leur installation en plein air, permet en plus de la distraction une amélioration du bien-être physique, psychique et social de la personne.

Les appareils ont été développés de manière intégrale par un médecin rééducateur et physiothérapeute.

Tous les articles ont été certifiés conformes à la norme européenne **EN 16630: 2015**, qui spécifie les exigences de sécurité et méthodes d'essai des modules fixes d'entraînement physique de plein air en accès libre.

Fabriqués en polyéthylène de haute densité, antigraffiti et sans entretien. Les mécanismes sont réalisés en acier inoxydable et polyéthylène. Les parties métalliques sont en acier de haute qualité (acier inoxydable, acier galvanisé, cathaphorèse, etc). (acier inoxydable, acier galvanisé, cathaphorèse, etc).

Circuito Nforma

Nforma Circuit

Circuit Nforme

CIRCUITO N-FORMA

Circuito compacto, muy completo, en dos configuraciones, hexagonal y zig-zag.
Materiales específicos para su instalación en playas y otros entornos agresivos, y por supuesto en cualquier otro emplazamiento.
 Fabricado íntegramente en **acero inoxidable AISI316 y polietileno de alta densidad**, antigraffiti, libre de mantenimiento.
 Avalado por médico rehabilitador y fisioterapeuta colegiados.
 Todos los elementos están certificados en el cumplimiento de la **Norma EN16630:2015**, que establece los requisitos de seguridad y métodos de ensayo de los equipos fijos de entrenamiento físico instalados al aire libre.

N-FORMA CIRCUIT

A very complete compact circuit, with two different configurations: hexagonal and zig-zag.
Specific materials to be installed directly on the beach or other aggressive environments and, of course, at any other place.
 Entirely manufactured with **AISI316 stainless steel and anti-graffiti, maintenance free HDPE**.
 Backed by qualified rehabilitation physicians and physical therapists.
 All units are certified in compliance with European Standard **EN16630:2015**, which sets the safety requirements and test methods of permanently installed outdoor fitness equipment.

CIRCUIT NFORME

Circuit compact, très complet, en deux combinaisons différentes: hexagonale et en zig-zag.
 Utilisation de **matériaux spécifiques pour être installés directement sur des plages ou des environnements agressifs**, et bien sûr, dans tout autre emplacement.
 Fabriqué entièrement en **acier inoxydable AISI316 et polyéthylène de haute densité**, antigraffiti et sans entretien.
 Avalisé par des médecins rééducateurs et physiothérapeutes reconnus.
 Tous les articles ont été certifiés conformes à la norme européenne **EN 16630: 2015**, qui spécifie les exigences de sécurité et méthodes d'essai des modules fixes d'entraînement physique de plein air en accès libre.
