Mobilier urbain

SERIE MADERA

La madera utilizada en los bancos proviene de bosques con certificación de gestión forestal sostenible mediante proveedores cuya cadena de custodia está certificada. Según modelos, madera tropical con certificado FSC, o Pino Rojo del Norte con tratamiento en autoclave certificado a nivel 4, según normativa EN351-2, ambas acabadas con protector láser a poro abierto. Soportes fabricados en acero de alta calidad con distintos acabados y tratamiento

WOOD SERIES

The wood used to make the benches comes from forests certified for sustainable forest management through suppliers whose chain of custody is certified. Depending on the models, tropical wood with FSC certificate or selected Northern Red Pine (Pinus Sylvestris), V quality, vacuum pressure treated, certified at P4 level according to EN351-2 regulations, and with open pore protector finish. The supports are made of high quality steel with different treatments and finishes.

SÉRIE BOIS

Le bois utilisé sur les bancs provient de forêts avec certification de gestion forestière durable à travers des fournisseurs dont la chaîne de traçabilité est certifiée. Selon les modèles, nous utilisons du bois tropical certifié FSC, ou du Pin Rouge du Nord (Pinus Sylvestris) avec traitement en autoclave certifié niveau P4, selon la norme EN351-2, tous les deux avec finition laser à pores ouverts. Supports fabriqués en acier de haute qualité avec différents traitements et finitions.

SERIE RECICLADO

El plástico reciclado es la última innovación en materiales para el mobiliario urbano. Su resistencia a la intemperie y al vandalismo es muy superior a la madera, reduciendo el mantenimiento y su coste al mínimo. Se obtiene a partir de plástico procedente de la recogida selectiva de residuos, fundamentalmente de botellas de leche, mediante procesos de extrusión de plástico para la obtención de listones. Es 100% reciclado y reciclable, formado únicamente por polietileno de alta densidad (HDPE). Es una inversión en un producto respetuoso con el medioambiente, sin duda el mobiliario urbano del futuro.

RECYCLED SERIES

Recycled plastic is the latest innovation in materials for street furniture. Its resistance to weather and vandalism is much higher than that of wood, thus reducing maintenance and its cost to a minimum. Obtained from plastic from selective waste collection, mainly from milk bottles by plastic extrusion processes in order to obtain slats. It is 100 % recycled and recyclable, made up exclusively of high density polyethylene (HDPE). It is an investment in an environmentally friendly product, no doubt the street furniture of the future.

SÉRIE RECYCLÉ

Le plastique recyclé est la dernière innovation en matériaux pour le mobilier urbain. Sa résistance aux intempéries et contre le vandalisme est très supérieure à celle du bois, réduisant l'entretien à un coût minimal. Il est obtenu à partir de plastique provenant du ramassage sélectif de résidus, principalement de bouteilles de lait, suivant des processus d'extrusion de plastique pour l'obtention de lattes. Il est 100% recyclé et recyclable, composé uniquement de polyéthylène haute densité (HDPE). C'est un investissement dans un produit respectueux de l'environnement, sans aucun doute, le mobilier urbain du futur.
